

# EASYbond vibration isolation

Made from recycled polyurethane foams

EASYbond vibration isolation is a product to reduce the transfer of vibrations between object and construction.

## Profits

- ✓ Vibration insulation
- ✓ Based on recycled polyurethane foams
- ✓ Very consistent composition

## Applications

- EASYbond for subfloors (1 cm, density of 200 kg/m<sup>3</sup>): It has the perfect density for an application under parquet or laminate.
- EASYbond decoupling (3 cm, density of 140 kg/m<sup>3</sup>): which is a perfect fit for heavy vibrations from machines. Another application is to create an so called floating floor.

## Size

100 x 50 cm / 100 x 100 cm.

## Color

Varies from batch to batch.

## EASYbond for subfloors

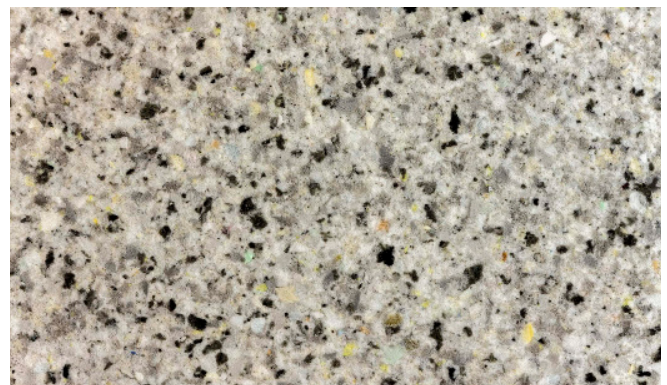

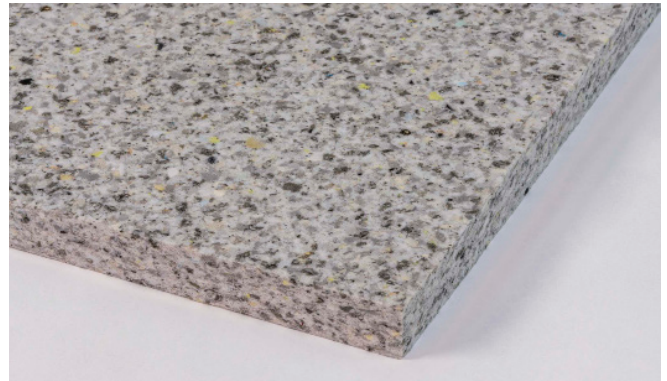

This EASYbond (1 cm thick) is designed to be placed directly on the floor. Afterwards the parquet or laminate is placed on top of the EASYbond. Make sure that the laminate or parquet does not touch the wall for best results. On wooden floors, this product can perfectly be combined with EASYmass 14 kg/m<sup>2</sup> mass plates to reduce vibrations.

## EASYbond decoupling

EASYbond vibration isolation with a thickness of 3 cm and a specific weight of 140kg/m<sup>3</sup> is designed to create an so called floating floor and to prevent contact noise.

How to create a floating floor:

- Make sure that the floor is flat and the EASYbond is placed directly on the hard floor. If it's a wooden floor, we advise to applying EASYmass mass plates first.
- The screed is placed directly over the EASYbond. By applying the layers crosswise, the floor becomes one. Make sure that the floor doesn't touch the walls.

### **Composition**

This product is made from recycled polyurethane. The color of the product can vary from batch to batch. EASYbond is specially made for vibration isolation, which is why the structure of the product is more consistently than comparable products.

### **Firesafety**

EASYbond vibration isolation is fireproof regarding FMVSS 302.

### **#weareacoustics**

EASY Noise Control is the specialist in acoustics and sound insulation. We are market leader in solutions at the field of room acoustics for buildings. In addition, we supply a wide range of acoustic materials directly from stock.

### **Ordering or more information**

Visit our website or showroom for acoustic advice or contact us by telephone for an appointment on location.
