

EASYphoto

Acoustic photo panel

The EASYphoto acoustic photo panel is a very popular solution for reducing reverberation and thus improving the acoustics. The possibilities are endless; any photo can be printed on the panel, as long as the resolution is high enough. The EASYphoto acoustic photo panels are known for their high quality, therefore giving all colours their true expression.

Advantages

- ✓ Available in custom sizes
- ✓ Print of your choice
- ✓ 100% recyclable

Applications

- Offices
- Houses
- Restaurants
- Classrooms

Top layer

Textile

Frame colour

Aluminium, White (RAL9010), Black (RAL9005)
RAL colours (price on request)

Stock Thickness

17 mm en 50 mm

Customisation

For the maximum size of the photo panel, one of the two sides can be a maximum of 300 cm, for the other side, there is no limit. The calculation model can only be used for photo panels with a maximum ratio of 2:1. Please contact us for photo panels with a larger ratio. Lengths greater than 190 cm can be supplied in several parts.

Send a photo

In addition to a photo, you can also choose to have the panel printed with an illustration or solid colour. You can use royalty-free stock photos for this, available via the 123RF website: <http://nl.123rf.com/>.

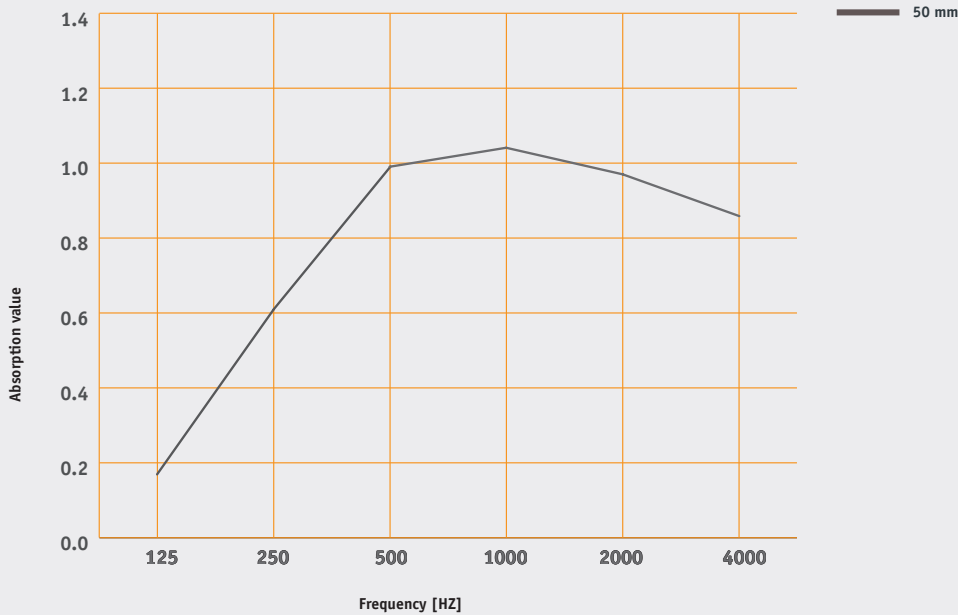

Image replacement possible

The image is printed on an acoustic open canvas. This canvas is cleverly stretched in the frame and is easy to assemble and disassemble within a few minutes. This also makes it very easy and inexpensive to change the print; you only need to purchase a new canvas and not a completely new system.

The absorption values are measured according to EN 354:2003

EASYphoto

Maintenance

The canvas can be carefully vacuumed under low power. If a stain appears on the canvas, it can be removed with a clean, damp cloth. If this does not work, you can try to wash the canvas at 30 degrees (do not spin) in the washing machine.

Note: Do not use strong cleaning agents such as dishwashing liquid, etc.

Installation

EASYphoto acoustic photo panel will be sent to you as a do-it-yourself package containing the profiles for the frame, the acoustic polyester wool and the acoustic canvas. Screws and plugs are not included with this product. Installation is very simple and can also be carried out by less experienced DIYers. Lengths greater than 190 cm can be supplied in several parts. EASYphoto is a permanent solution. The aluminium frame is screwed to the wall and the sound-absorbing filling is mounted using self-adhesive velcro strips. If desired, it is possible to have EASYphoto installed by the EASY Noise Control installation team. For more information, consult the EASYphoto installation manual.

#weareacoustics

EASY Noise Control is the specialist in acoustics and sound insulation. We are market leader in solutions at the field of room acoustics for buildings. In addition, we supply a wide range of acoustic materials directly from stock.
